ABOUT ME

I am an IT Specialist with over a decade of experience, specializing in troubleshooting and process automation to enhance efficiency. As a self-taught learner, I quickly adapt to new technologies and challenges.

WORKING EXPERIENCE

IT Specialist / Back Office
Asfarma Georgia

2012 — Present

In addition to my role as an IT Specialist, I also assist with various office tasks and support:

- Performed data analysis by gathering information from various sources through scripts and manual processes, transforming it into required formats, and conducting detailed analysis to derive actionable insights.

- Conducted business analysis for a company project, focusing on calculating and evaluating individual performance metrics for medical representatives.

- Organized and managed a real-time tracking system, implementing tracking software on Windows/Linux servers to monitor Android/iOS devices.

- Managed the company's Facebook page, overseeing ad campaigns and analyzing engagement statistics.

- Developed a personal collection of scripts to streamline workflows and automate tasks, including web data parsing, database storage, and general workflow automation.

Trainee
Georgian Railway

2011 — 2012

After University, I worked for Georgian Railway:

- IT / Helpdesk Support
